PROFILE

- Working as a full-time Data Engineer at Meta enabling AI Support for Premium Audience (Creator + Advertiser)
- Data Engineer with 6+ years of experience in designing advanced data pipelines and analytics solutions
- **Language:** Python, SQL, R, Shell Scripting, NoSQL (Mongodb)
- **Tech Stack:** Hadoop, Spark, Hive, DBT, SQL Server, Tableau, PowerBI, Git, GCP, BigQuery, AWS, S3, EC2, IAM, Azure Databricks, Azure Functions, Postgres, AWS Redshift, Bash, Kinesis, SSIS, SSAS, Presto, Dataswarm
- **Skills:** Data Modeling, Data Analysis, Machine Learning, Agentic Workflow, Deep Learning, Software Development, Artificial Intelligence, Prompt Engineering, A/B Testing, Data Warehousing, Agile Scrum, NLP
- **Certifications:** AWS Certified Data Engineer - Associate, AWS Certified Cloud Practitioner, Tableau Desktop Specialist, INFORMS-aCAP, Azure Data Fundamentals, Azure AI Fundamentals, Data Structures and Algorithms

EDUCATION

Purdue University, Daniels School of Business

West Lafayette, IN

Master of Science in Business Analytics and Information Management - STEM

August 2025

National Institute of Technology (NIT), Hamirpur

Hamirpur, HP

Bachelor of Technology, Mechanical Engineering

May 2019

PROFESSIONAL EXPERIENCE

Meta

Menlo Park, CA

Data Engineer

September 2025 - Present

- Built end-to-end Enforcement to Support funnel for Meta AI Support (Creators + Advertiser) using Presto ETL, Dataswarm orchestrator reducing enforcement spike detection from hrs to min and contributing \$7.5M+/year in unblocked revenue
- Authored 60+ AI support metrics in Meta's semantic catalog using multi-dimensional cube, ensuring dimensional conformity and enabling monitoring of support health metrics across creator and advertiser segments
- Led migration of AI Support scorecard from logger tables to canonical data sources using Presto ETL pipeline, leveraging MyClaw and Claude agent swarm, achieving 2-day delivery, zero downtime and less than 1% deviation
- Established ground truth measurement for LLM-powered AI support chatbots implementing server side logging, building P/R measurement pipeline, partnering with Ops for labelling and unblocking AI model launches for new support issue types
- Built LLM (Llama 4) model to compute conversation quality of AI support experiences by tracking drop-offs, failed human handovers, incorrect tool invocations for users with active subscriptions

American Express

Gurgaon, India

Data Engineer

June 2021 - July 2024

- Developed production ETL workflows feeding 10+ Tableau/Power BI risk dashboards tracking 100+ KPIs via Hive, PySpark, Tez, Airflow. Delivered 45+ change requests powering 350+ credit risk metrics across business functions
- Engineered AWS ingestion pipeline spanning S3, EMR, EC2 and Redshift for Experian credit data and automated legacy Excel/Powerpoint reporting via HiveQL and Spark jobs, saving 60+ manual hours monthly
- Refactored 20k+ lines of critical reporting code, cutting execution time by 35% and footprint by 4K+ lines. Shipped high-priority risk product in 2 weeks vs. 8-week baseline, earning multiple Blue Rewards
- Built Python-based JIRA tracking app using REST APIs and Tableau, streamlining analytical delivery timelines by 40%; led Agile Scrum ceremonies and mentored 8+ interns, earning Analyst of the Quarter and SVP Award

EXL Service

Noida, India

Data Engineer

September 2019 - June 2021

- Automated 10+ OLAP pipelines on Hadoop using Hive, Spark and shell scripting for Aetna (CVS Health) provider team
- Migrated Azure Data Factory workloads to Azure Databricks via Python notebooks, boosting processing speed by 20%
- Implemented scalable ETL workflows using AWS Glue, Lambda, Athena, EventBridge and Step Functions to migrate patient health data from SQLServer to AWS RDS with Terraform-based infrastructure-as-code
- Designed fact-dimension data model with snowflake schema enabling OLAP cube construction. Created 10+ Tableau dashboards tracking campaign KPIs alongside Aetna-affiliated clinical stakeholders
